Abstract/Poster

The DRAGON Institute – Mekong, Can Tho University (in Vietnam also called the "Research Institute for Climate Change – Can Tho University", or shorter as DRAGON-Mekong-CTU) was established jointly by the governments of the United States and Vietnam for cooperation in research and training to maintain healthy ecosystems and the sustainability of major river deltas in a changing climate. DRAGON–Mekong–CTU is a member of DRAGON institutes network with USGS. The mission of the Institute is to become an internationally recognized centre of excellence for research and training on the impacts of climate change on major river deltas, and enhancing the resilience of delta communities and ecosystems to climate change.

This poster introduces the goals, relationship networks, research foci, international and national collaborations and contact address of the DRAGON–Mekong–CTU.
